

OSUMA
MADE IN FINLAND

Osuma Catalogue 2018

The history of Finnish based Osuma goes back to the early 90's, when the company owner, a passionate hunter and benchrest shooter, developed the first set of scope mounts to meet his own exacting standards. The company has passed from father to son, but the very same scope mounts are still part of Osuma's product portfolio, which now includes more than 150 different products. The same ideology lies behind every product we've designed and manufactured. We learn from our own hunting and shooting experience, and listen to the needs of other hunters. This helps us to provide new innovations, and improve existing solutions for our fellow hunters and shooters.

Our main focus is scope mounting, which is often the Achilles' heel of a rifle shooter's equipment. We manufacture high quality mounts that are both reliable and easy to use. We've achieved this through our long experience in product development, the latest

manufacturing technologies, and high grade materials. Our portfolio provides products for most popular rifles and scopes on the market, as well as highly specific solutions.

The new and improved line of suppressors has also become a big part of our business. Osuma suppressors combine excellent recoil reduction, ample sound suppression, light weight, and ergonomic design. We also cannot help mentioning our best seller: the Trigger Widener. Although we do say so ourselves, the Osuma Trigger Widener is the best pound-for-pound shooting accessory in the world!

All Osuma products are designed and manufactured in Finland, to guarantee the highest possible quality standards.

Jukka Olkkonen,
CEO, Osuma Products

Scope Mounts

This is where it all started more than 20 years ago. Osuma Scope Mounts have proven their dependability for more than two decades. The scope mounts are made from high grade aluminium, and manufactured with state of the art tools and methods. They are dimensionally extremely precise, and made with true professional skill. The surface is anodized for durability.

Osuma Scope Mounts are an excellent solution when you need to set your scope higher than normal. Available in three different heights (25mm, 35mm, 45mm); three mounting alternatives (11mm, 17mm, Optilock); and two options for tube thickness (1" and 30mm).

Our Scope Mounts are also very light thanks to the material used; they only weight 120-155 grams, depending on the model.

Osuma Scope Mounts

Dimensions: tube diameter/rail/free space/colour

1"/11mm/25mm black

30mm/17mm/45mm black

Scope Mounts for Combination Guns

We have also introduced a set of Scope mounts for combination guns. Osuma 11mm scope mounts are made especially for Marocchi combination guns, but they work perfectly with all break barrels with an 11mm dovetail for scope mounting. Available in 1", 30mm, 34mm 36mm and 40mm rings.

Mount for 11mm rail with 36mm rings LO or ME

Mount for 11mm rail with 40mm rings LO

Red Dot Sight/ Holosight Mounts

We all know that in fast hunting situations every little detail of our equipment counts. We kept this in mind when we designed our line of Holosight Mounts. Our goal was to design Holosight Mounts that would put the sight as close to the bore as possible, which is a significant benefit in fast shooting situations. Aside from being reliable and simple to use, the speed advantage just might make the difference between a successful hunting trip, and a story of the one that got away.

We offer mounts for all the most popular platforms and sights. Please see the compatibility chart for further information.

Osuma Holosight Mounts

Docter Sight, Burris Fastfire, Meopta Meosight and Zeiss CompactPoint (Zeiss Platte)

Holosight mount for Sako rail

Osuma Blaser Mounts

Our Blaser Mounts are probably the crown jewel of our product portfolio. The new improved design offers world class precision and reliability, and is extremely easy to adjust. The solid mount offers a variety of options for mounting different kinds of scopes and sights. Please, see the chart for scope mounting options.

Mount for Swarovski SR rail

Osuma Blaser Adapters

The Blaser mounting system itself provides an excellent quick mount platform for scope mounting. Now we can offer the same mounting system for a number of other rifles! The Osuma Blaser Adapter converts a traditional scope mounting rail to a Blaser style mounting system. By fitting the Osuma Blaser Adapter on your rifle, you can even change sights in the middle of your hunting expedition without having to readjust the sight. The adapter is fastened with screws to the holes bored in the bolt body and fitting the adapter doesn't require any special tools or skills.

Osuma LRS Scope Mounts with Four Rings

Whether you're an avid long-range shooter or a MIL/LE professional user, the Osuma LRS (Long Range Shooting) Scope Mounts are the perfect solution for you. The four-ring attachment and a solid single piece mount guarantee that your scope will not change zero, no matter what caliber you use, or how demanding the conditions. There are three different tilt options available: 0 MOA, 15 MOA, 30 MOA. The Osuma LRS Scope Mount can be attached to either a 17mm dovetail or picatinny rail.

Osuma LRS Mounts with 4 Scope Rings

1" LO or ME 17mm dovetail

30mm LO, ME or HI 17mm dovetail

34mm LO 17mm dovetail

34mm LO Picatinny

36mm LO or ME Picatinny

40mm LO Picatinny

*** Tilt options: 0 MOA, 15 MOA and 30 MOA

Osuma Scope Rings and Ring Mounts

Osuma scopes are made from high-grade aluminium, and manufactured with state of the art tools and methods. They are dimensionally extremely precise and made with true professional skill. The surface is anodized for durability.

We provide rings for our own bases, as well as for Optilock bases and Picatinny rails; and for every main tube size from 1" to 40mm. We've paid extra attention to details such as the screws used to combine the two halves of the rings. Our rings can be opened and tightened without worrying that the screw heads wear out.

Scope Mounts for Rail Mounted Sights

Many modern scopes have a rail mounting system that is in many ways safer and easier to use than traditional ring mounting. We can offer rail mounts for two of the most popular models: ZM Rail and SR Rail.

The ZM Rail (developed by Carl Zeiss) is used by Zeiss, Meopta, Schmidt & Bender and Leica. The SR Rail (developed by Swarovski) is used by Swarovski and Kahles.

Osuma Rail Mounts are available for 11mm rails, 17mm rails, Optilock bases and the Blaser mounting system.

Osuma Suppressors and Heat Covers

The new and improved line of Osuma Suppressors combine excellent recoil reduction, ample sound suppression, light weight, and ergonomic design. For example, the Osuma 170 extends the length of your rifle by only 90 millimeters and weighs a mere 335 grams. For larger calibers, we recommend the use of the Osuma 220 silencer.

Osuma Suppressors are available in calibers from .222 to .45 and with all the most popular mounting threads. The color options are black and silver.

Miscellaneous Accessories

“Small things, big difference” – Series

Trigger Widener

Although we say so ourselves, the Osuma Trigger Widener is the best pound-for-pound shooting accessory in the world. The Osuma Trigger Widener provides a perfect feeling of the trigger action. The wider surface distributes the finger pressure so that the feeling of trigger resistance becomes considerably lighter.

Trigger wideners are available in widths up to 7 and 8 mm. The design enables attachment to almost all types of triggers.

Osuma Sling Swivel Adapter for UIT Rail

The high quality blue annealed steel adapter made from one piece fits the standard UIT rail. The adapter also enables not only the mounting of the GT sling swivel, but also the fitting of most bipods to guns with a UIT slide rail.

Osuma Oversized Bolt Knob for Blaser R8

The Oversized Bolt Knob makes the action of your Blaser R8 feel even smoother. The ergonomic design allows you to open the bolt with two fingers, and push it back with the palm of your hand.

Osuma Special Scope Mount

Osuma Special Scope Mounts are a great help for those who have had to change their aiming eye, for example as a result of an accident. With the special mount, a right-handed shooter who has suffered an accident can still shoot right-handed, and does not need to learn to shoot with their left hand. Correspondingly, the sight can be changed to the opposite side for a left-handed shooter. The Osuma Special Scope Mount is attached to the existing scope mounts (preferably using a 1" ring).

Osuma Mirage Guard

The Osuma Mirage Guard is designed especially for Osuma Suppressors, but is also suitable for many other brands. At the end of the suppressor is an adjustable aluminium ring, to which the elastic material is attached. On the bolt body side, the mirage strap is fixed to the scope mount. Because of this, mirage can be eliminated all along the barrel.

Osuma Biathlon Harness

Durable and well-fitted Osuma skiing harnesses are the right choice for winter elk hunting, bird rifles or biathlon. The forend is mounted on the UIT rail and the butt end with cords. The cords are flexible, so the rifle can be tightly strapped to the back close to the body, which is an advantage when running and skiing.

Osuma Case Collector

The cartridge case collector bag is a handy tool when there is no time to pick up cases. There is a provision for screw attachment in the steel frame. The bag itself is made of durable material. It can be folded shut so that no cases can fall out.

Osuma 17mm Scope Mounting Dovetails

We have designed 17mm dovetail pieces for the Sauer 101 and Mauser M12 rifles. These aluminium pieces enable the attachment of scope mounts to the 17mm dovetail in Tikka rifles. Mounting screws are included with each set of dovetails.

Osuma Picatinny Rail for Sauer 100

The Picatinny Rail can be attached to a Sauer 100 rifle, and works as a scope mounting platform. Mounting screws are included with the Picatinny Rail.

Osuma UIT Rails

A mandatory accessory for a biathlon rifle. The rail can be attached either on the side, or at the bottom of the stock. Available in 100mm and 200mm rail lengths.

Osuma Benchrest Shooting Support

A forend designed specifically for benchrest shooting. A heavy stand and spikes made of tempered steel guarantee that the support will stay in place. The Osuma Benchrest Shooting Support features both rough and fine height adjustment, and precisely adjustable lateral movement. We recommend the Protector support bag as an accessory for benchrest shooting support.
